PROFILE

I study civil engineering, software engineering in my first semester of my master's degree at SDU (University of Southern Denmark). As a student in Software Engineering, I have gained a strong foundation in software development methods, data structures, algorithms, networks, computer systems as well as software testing and quality assurance. I have been able to develop my programming skills that I got from high school and at the same time I have gained experience with different programming languages and frameworks. My projects have also allowed me to become better and faster at solving problems. I am motivated by the endless possibilities that Software Engineering offers and the ability to create something that can change the world. I am excited at the prospect of working on projects that challenge me to think creatively and push the boundaries of what is possible. I'm also motivated by the opportunity to make a difference in people's lives by creating software that solves real-world problems. I am highly motivated to continuously learn and improve my skills so that I can keep up with the rapid developments in technology. I am confident that I can achieve my goal of becoming a successful software engineer.

Education

- HTX (218 - 2021)
- SDU (University of Southern Denmark)
 - Software Engineering (Bachelor) (2021 - 2024)
 - Software Engineering (Master) (Expected graduation year: 2026)

SKILLS

- **Programming language:** Java, PHP, TypeScript, JavaScript, Python
- **Database Management Systems (DBMS):** PostgreSQL, MySQL
- **Markup Language:** HTML
- **Styling Sheets:** CSS
- **Frameworks & Platforms:** Docker, Laravel, Spring, React, React Native

Spare time

In my spare time I enjoy exploring new technologies and programming languages by working on personal projects. I also like to stay active and take care of my body by going to the gym.
